FIRST AID HINTS

Burns and Scalds.	Apply immediately a solution of either Bicarbonate of Soda or Salt (teaspoon to pint of warm water) or as an alternative, a warm tannic acid (strong tea) poultice. If the burn is an extensive one, cover the area with sterilized gauze dressing, but do not break blisters. Treat for shock. Obtain medical aid.
Bites and Stings.	Apply Carbonate of Soda (Washing Soda) or Bicarbonate of Soda (Baking Soda). Cover with a dry dressing.
Choking.	Bend patient's shoulders forward and slap back. If person has fish bone in throat, press root of tongue with forefinger to induce vomiting. In case of infant, hold up by ankles.
Fainting.	Press head down between knees. If this is not successful, lie patient flat, undo tight clothing and allow free access of air. Apply cold water to head.
Shock.	Loosen any tight clothing but keep patient warm. Lay him flat on back, legs slightly raised. Give warm sweet tea or coffee unless internal injury is suspected. Get medical aid.
Sprains and Fractures.	Strap limb firmly. If arm, strap to body. If leg, to other leg.
Bleeding.	To arrest arterial bleeding (Blood is bright scarlet and spurts), apply firm digital pressure over clean pad and bandage. Raise bleeding point above the level of the heart. Obtain medical aid immediately. A tourniquet should NOT be used in first-aid.
Nose Bleeding.	Make patient sit up and breathe through mouth. Loosen clothing. Apply digital pressure to the nose. Cold water compresses to the back of the neck and nose will help.
Wounds or Cuts.	Wash with warm soapy water, always washing away from the wound. Apply sterilized dressing.

Rising and Setting of the Sun, Greenwich, 1958.
